Greatview Brick Aseptic The Leading Alternative Packaging Material

Meeting the highest standards in aseptic packaging

Protecting its content during distribution is the primary role of a package. And the more perishable the content is, the higher the demands on the package. If in addition the product is valuable and of high quality, the processing before packing must also be gentle. Aseptic processing and packaging is therefore used in the most demanding distribution environments where there is no refrigeration and the quality of the filled product must be kept in optimum condition. Greatview Brick Aseptic packaging material meets all international

standards for packaging of perishable foods. Our aseptic packaging material is produced to the highest quality specifications on state-of-the-art production equipment. Greatview Brick Aseptic packaging material is used in markets around the world to fill and distribute products ranging from plain white milk, flavored milk, juices, fruit drinks to all kinds of teas. Long life products packed in Greatview Aseptic packages are consumed by millions of consumers each day.

Value priced Aseptic packaging

Greatview Brick Aseptic is the alternative packaging material of choice. Customer service, quality and good value is leading more and more producers to turn to Greatview Aseptic Packaging Company Limited for their aseptic packaging needs. In a market where there formerly was no choice Greatview now represents a good option. Greatview Aseptic Packaging Company Limited stands for high quality material at values that benefit the industry and the end consumer. Our aseptic packaging material fulfills the highest legislative food standards and is certified according to the most stringent methods of testing by certification institutes in Asia, Europe and the Americas. Greatview Brick Aseptic packaging is tried and tested and performs equally well on all industry standard roll-fed filling machines. With no or only minor adjustments Greatview Brick Aseptic packages are formed, filled and sealed at high speed in a variety of sizes ranging from 200mL to 1L.

Stringent product and quality standards

The liquid packaging board, or LPB, used to produce our aseptic packaging for the international market is supplied by world renowned American board manufacturers. Greatview Aseptic Packaging Company Limited is a leader in the use of certified fibers for aseptic packaging. Certification and endorsement is provided by SFI, FSC and PEFC. Greatview Brick Aseptic packaging material is produced under food regulation hygienic conditions according to the highest quality standards. Greatview's converting factories are ISO 9001, ISO 14000 and BRIC BRC/IOP certified.

The aseptic packaging is printed in high quality flexo and flexo-process technology. Exclusively water based inks are used in the printing process. No solvents are present in our manufacturing process. Advanced in-line and rotary printers, automated conveyors, high speed slitters, robotic film wrapping and pallet loading provides for a safe production environment. Multi-layer extrusion lamination with metallocene LDPE guarantees a wide sealing window in the form-fill-seal filling machines. Continuous laser scanning of the packaging in the production process assures detection and elimination of any production defects. Finished reels are individually shrink wrapped and loaded onto pallets, which in turn are covered with a protective shrink film.

200mL Base 

GA Brick Aseptic 200mL Base
